

ResumeAI Backend UML and Workflow Diagrams

Compact evaluator copy: architecture, use cases, class model, service layers, complete workflow, and deployment view.

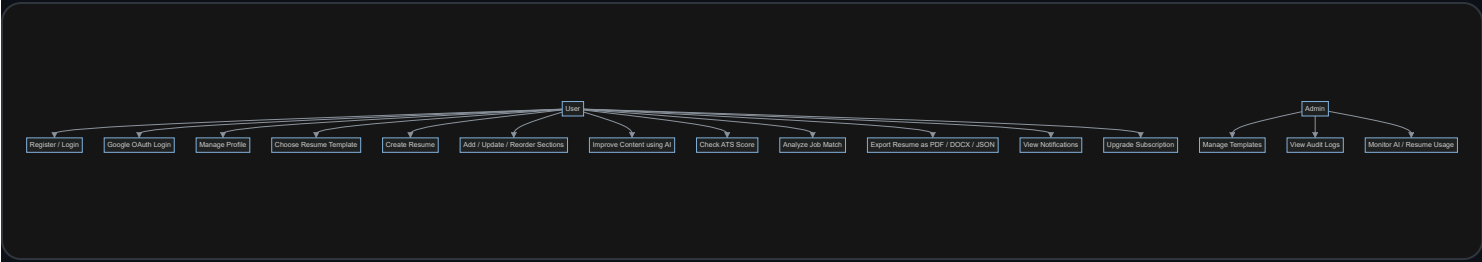

1. System Architecture Diagram

High-level system flow: user request starts from Angular, goes through API Gateway, reaches backend services, and uses MySQL/external integrations.

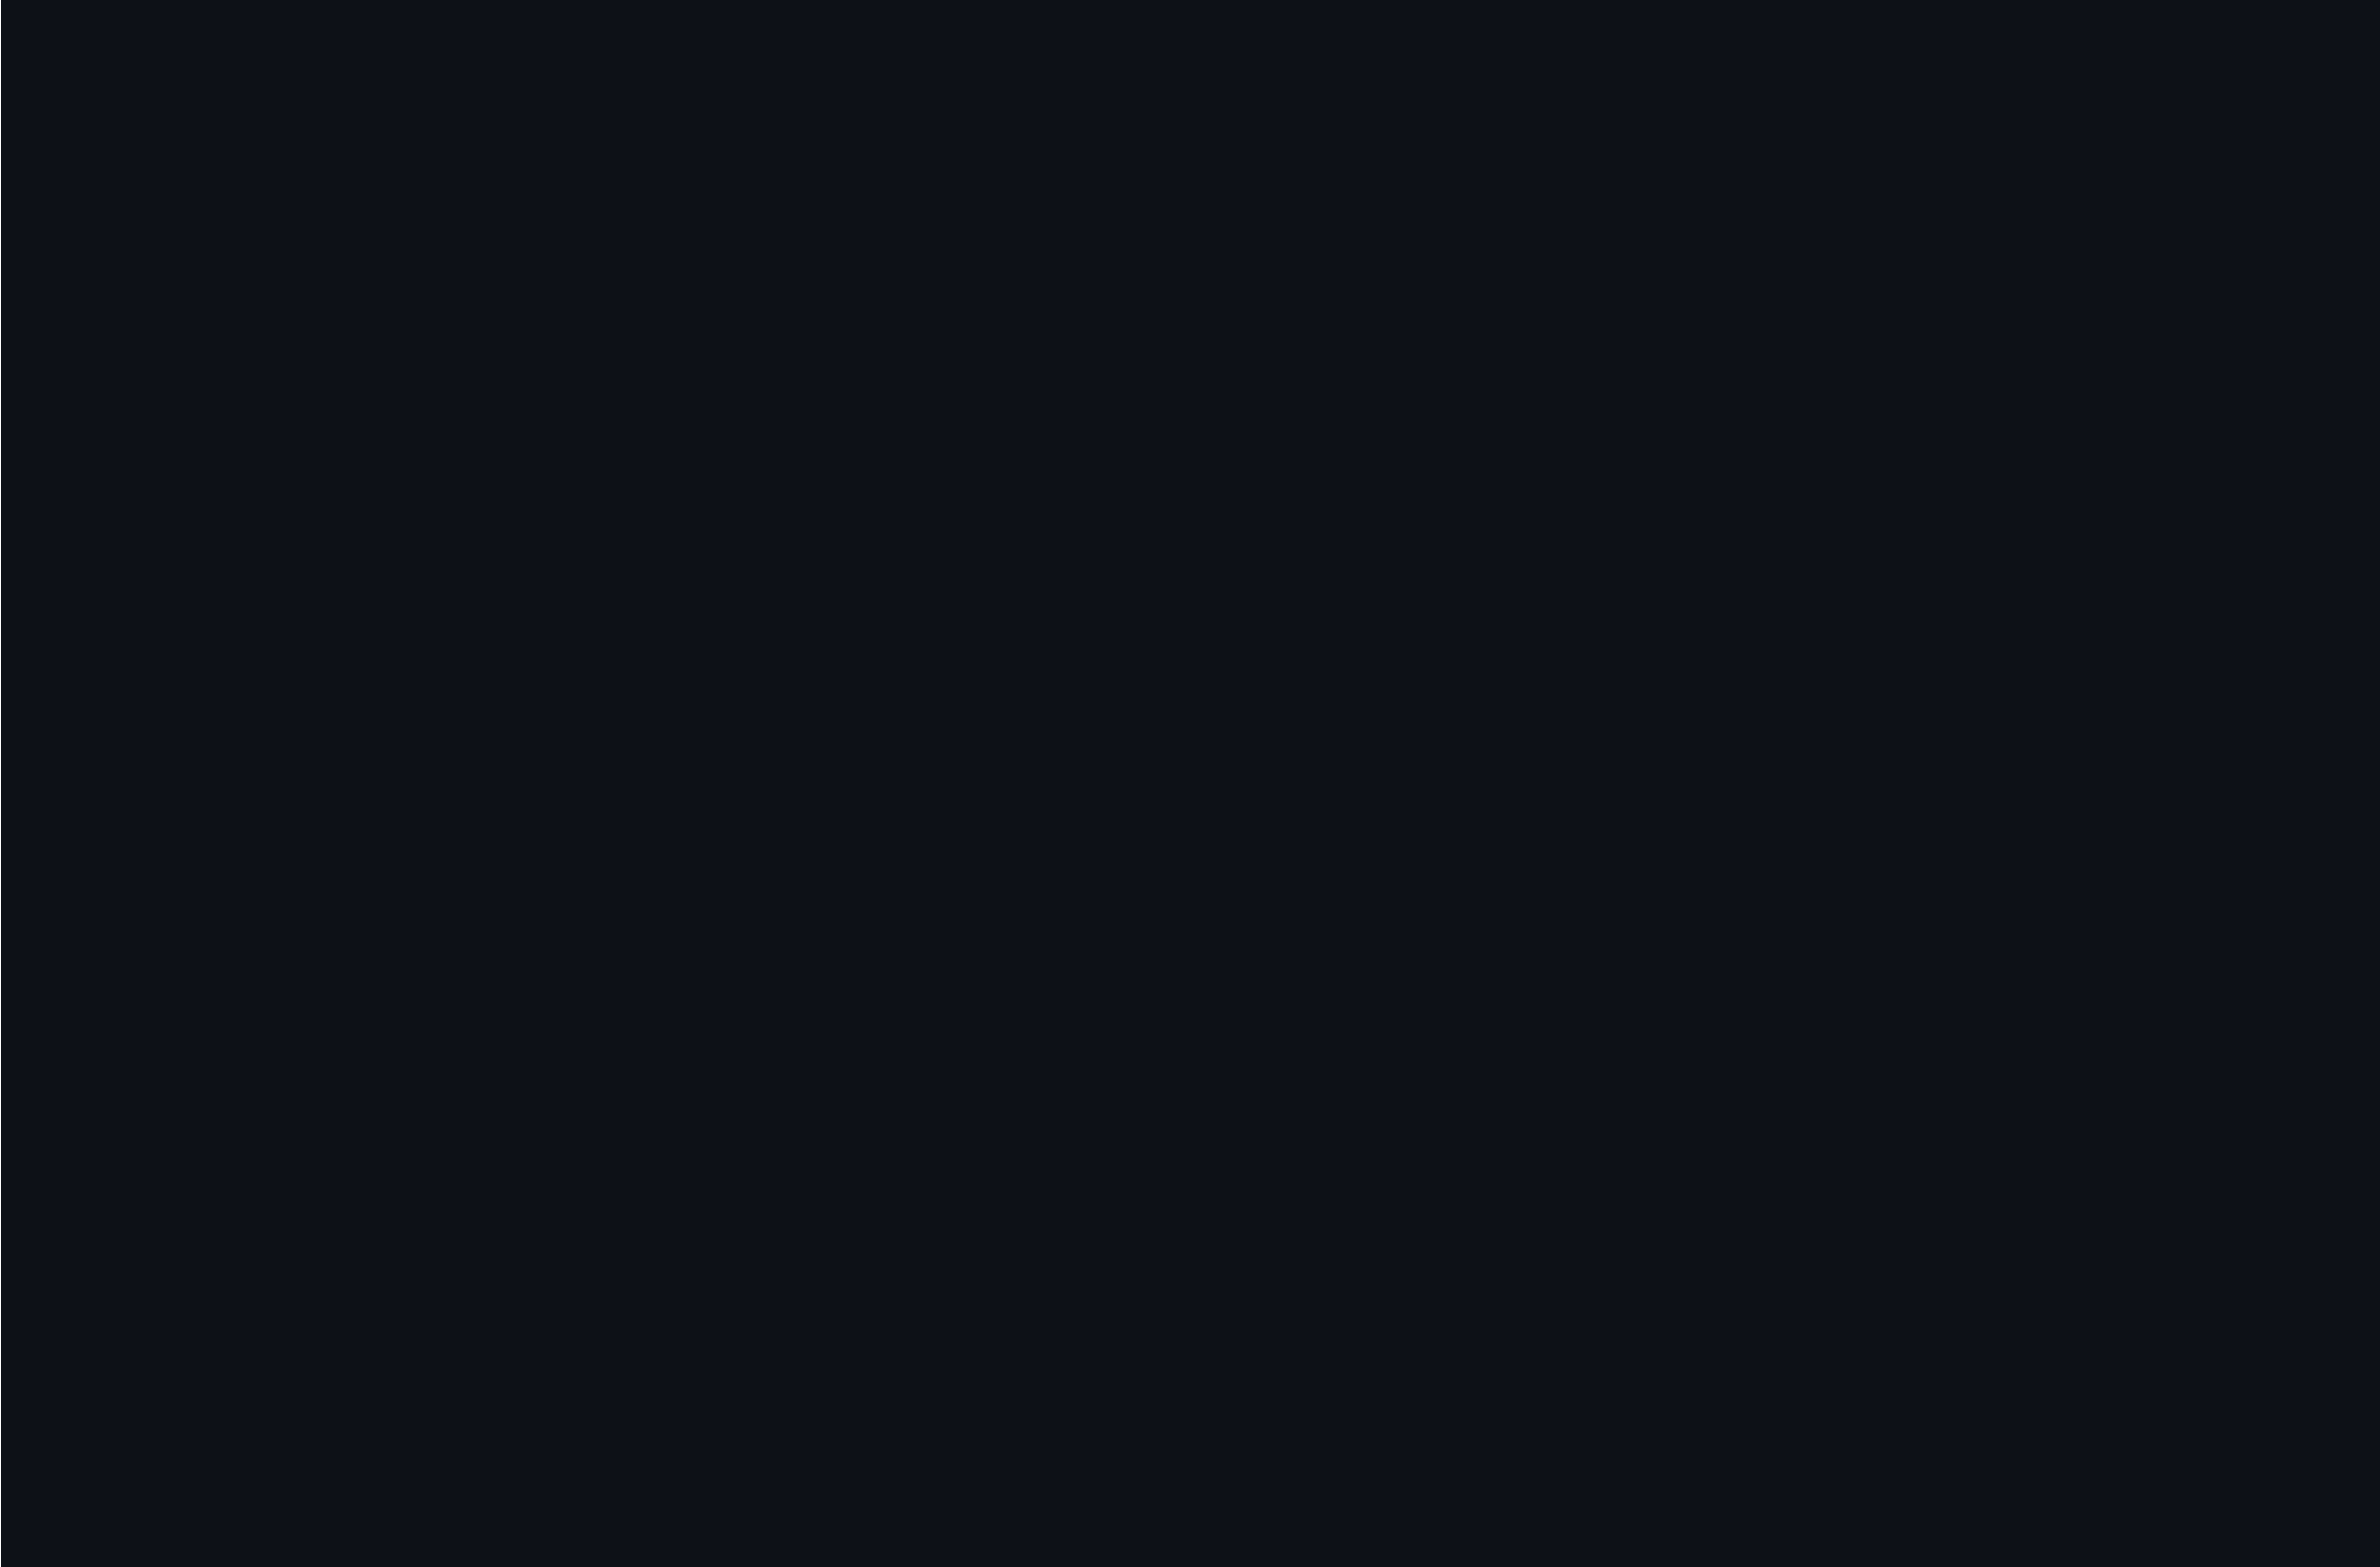

2. Use Case Diagram

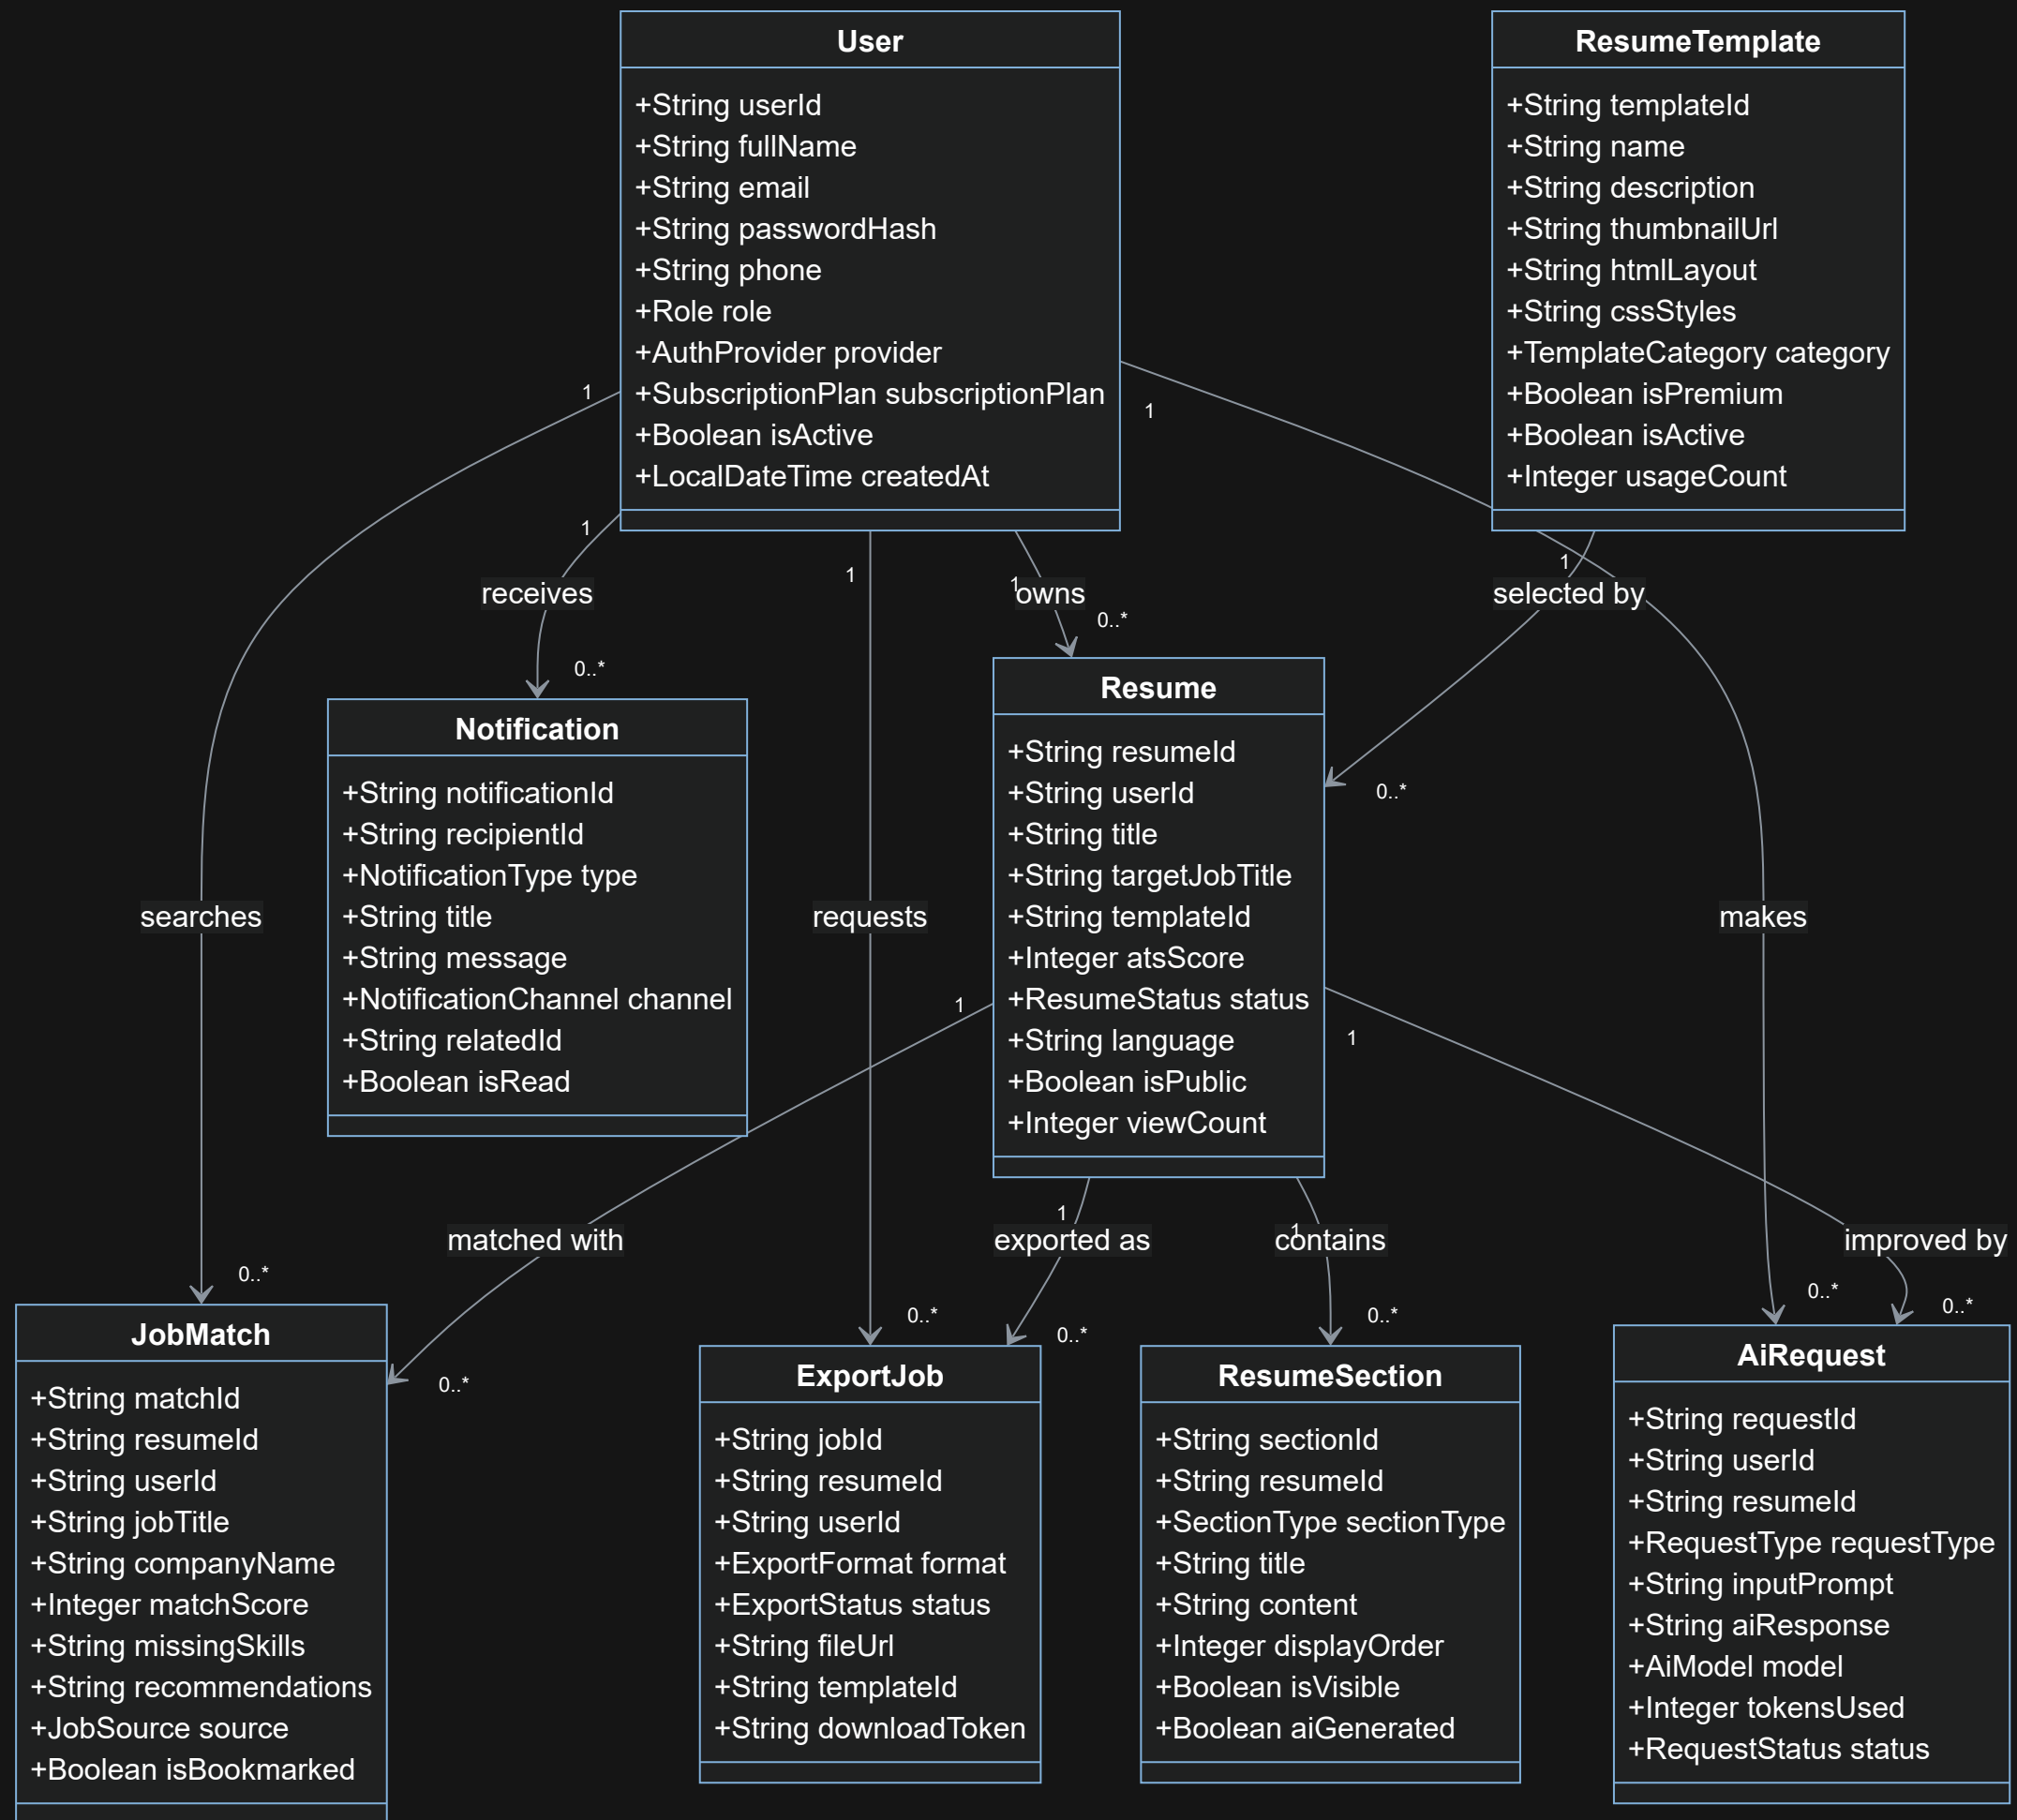

Main user and admin actions supported by the project.

3. Main Entity/Class Diagram

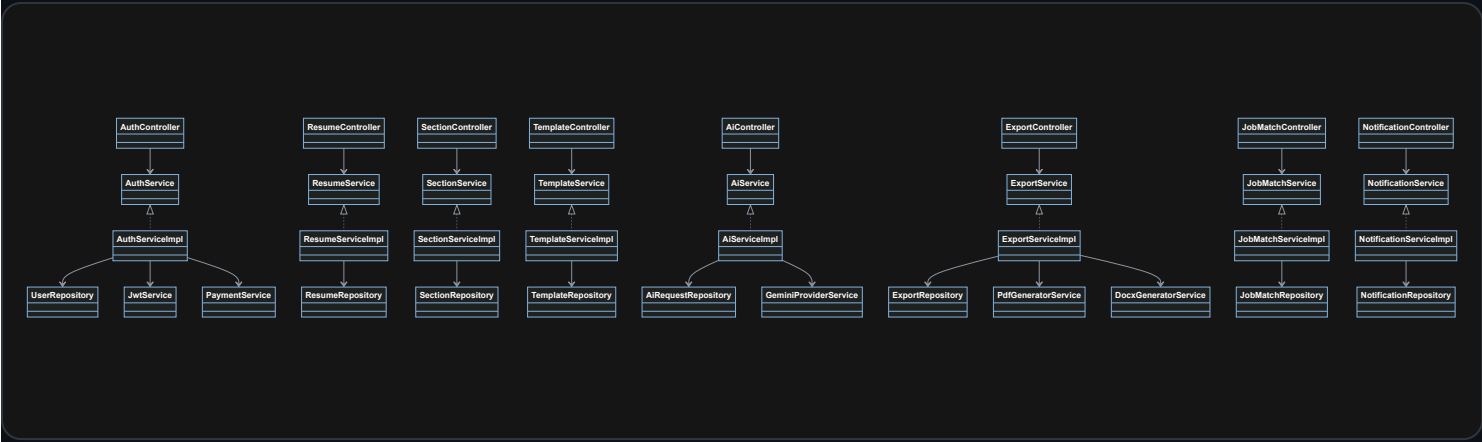

Core backend entities and how resume data connects with users, sections, templates, AI, exports, jobs, and notifications.

4. Service Layer Class Diagram

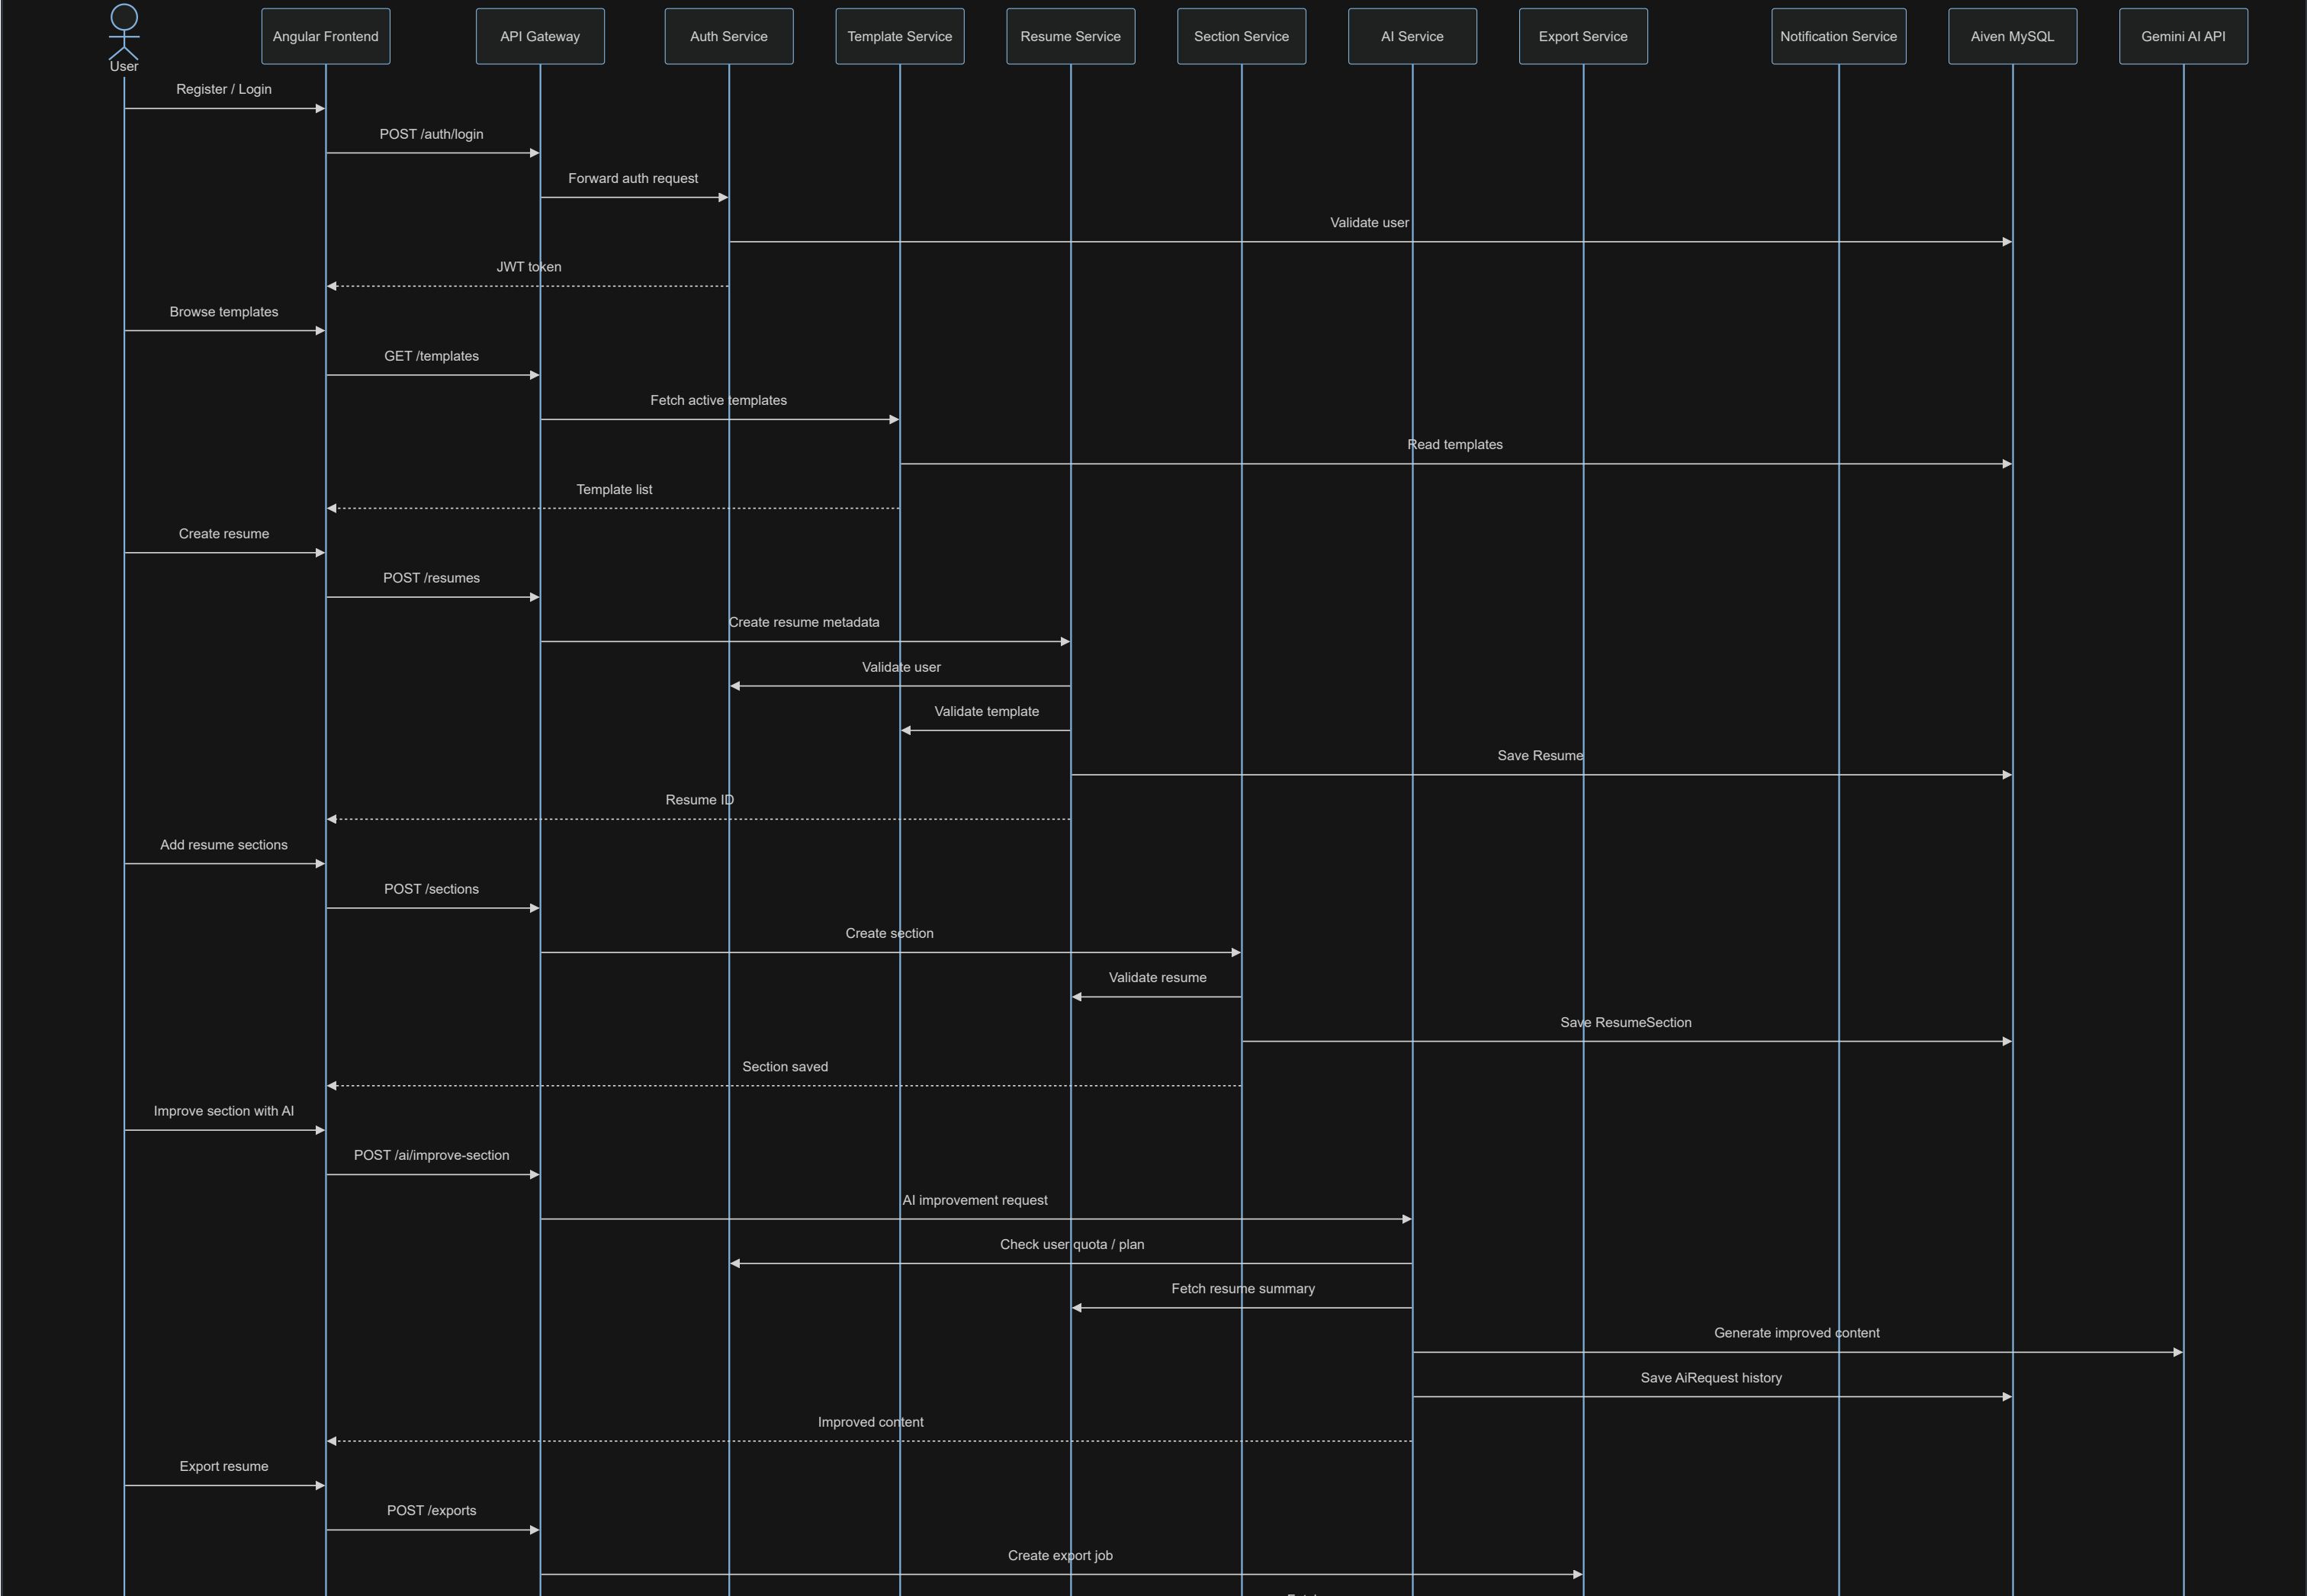

Spring Boot layer structure used inside each microservice.

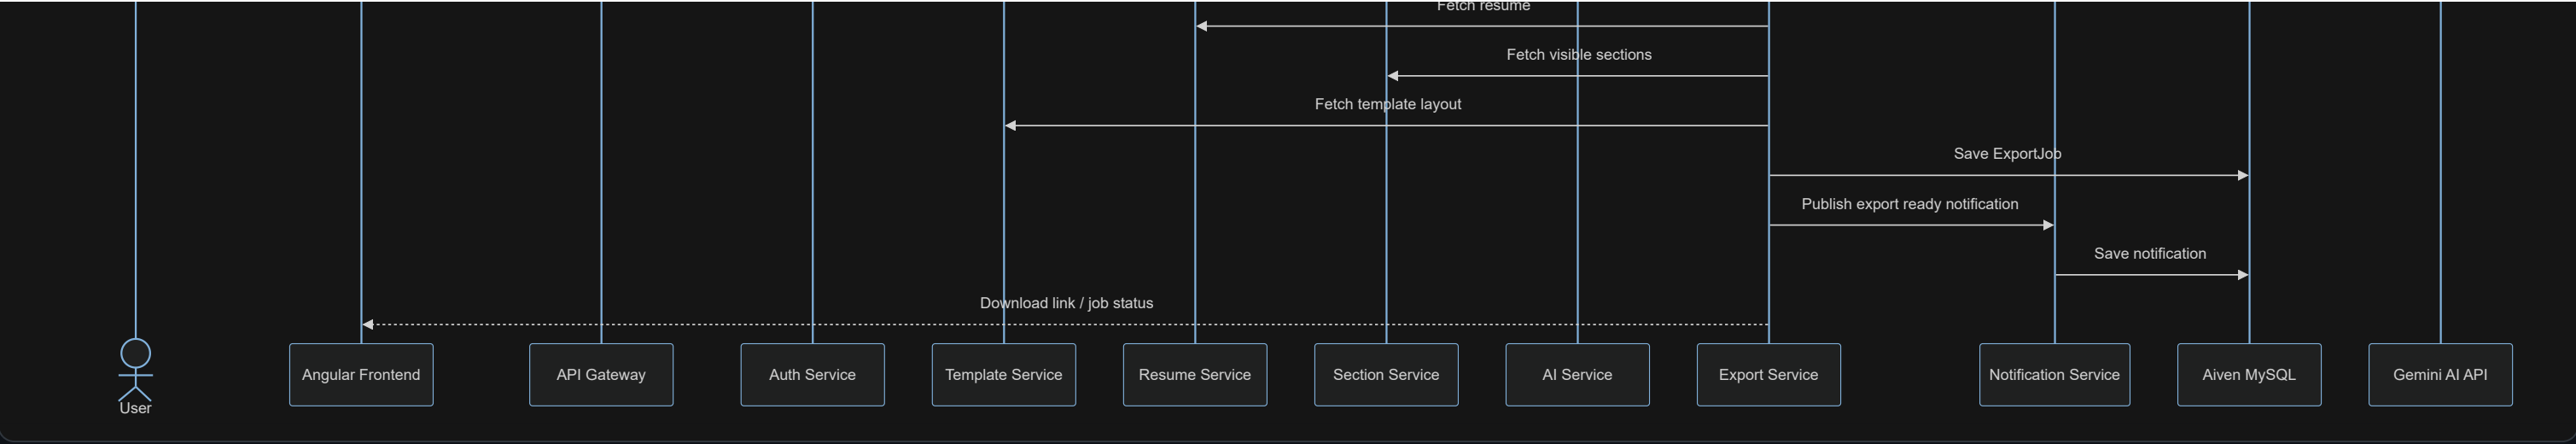

5. Complete Resume Creation Workflow

End-to-end resume creation workflow from login to export.

6. Deployment View

Deployment and quality setup using GitHub, Render, Aiven, and SonarCloud.
